ID: 3913 Reprint Last Receipt according to respective terminal

In this version, we enhanced Reprint Last Receipt function. If you having multiple terminal attached to 1 main PC, Reprint Last Receipt now will print the last bill by following the current terminal you are in.

From the above scenario,

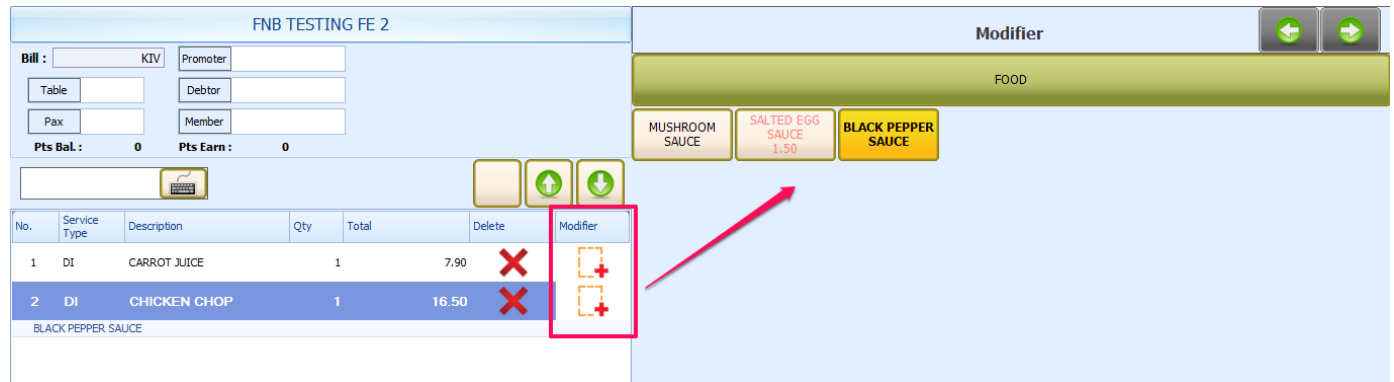

When **T01** press Reprint Last Receipt button, **T01-000520** will be printed.

When **T02** press Reprint Last Receipt button, **T02-000195** will be printed.

When **T03** press Reprint Last Receipt button, **T03-000277** will be printed.

ID: 3938 Add Modifier button in item ordering screen

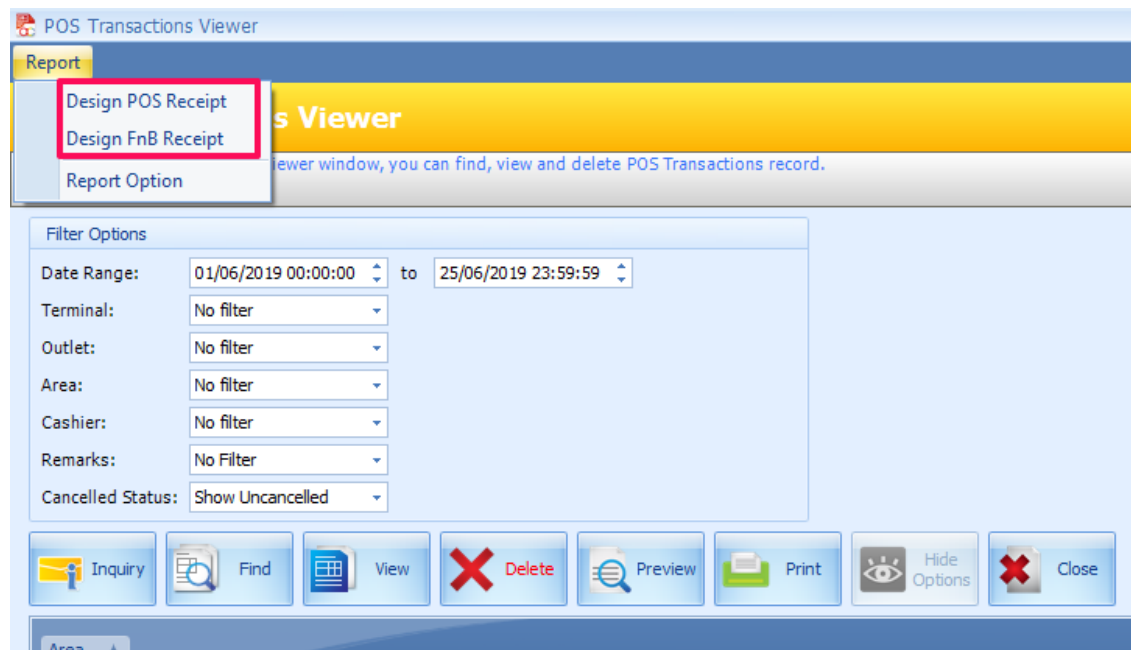

You are now having easier access to item's modifier selection. We added modifier button in item listing. By pressing the modifier button, you can choose the modifier for the item directly.

Note: You need to pull the modifier button out from column chooser.

ID: 3983 Support Report Design in POS Transaction Viewer

In POS Transaction Viewer, you are allowed to do report design for your receipt as well. In order to access this function, go to *More Function > Inquiry > Reports > POS Transaction Viewer*.

**** Please take note that the receipt format you amend here will reflect directly to the receipt you print for customer because they are sharing same report format.**

ID: 4027 Support Set FnB Ordering Screen ratio

With this version, you can set the Ordering Screen ratio from **More Function > Settings > Configuration Setting > Device Setting 2 > Screen Ratio**. Currently we provide 3 options that allow you to choose, which is 5:5, 4:6 and 3:7. Below are the differences between these 3 options.

5:5

4:6

3:7
